

Validian™ Media Protect

**Protection for
creative properties
and digital
media assets**

Introduction

As digitization continues to be exploited in the creative process, protecting your creative properties becomes less about physically safeguarding the recorded disc, tape or film and more about safeguarding the collection of intermediary and finished files that comprise your project.

With easy access to these digital assets from within the workflow and the ubiquity of the Internet, one leak, whether inadvertent or planned, can have devastating impact on projected business returns and carefully crafted audience anticipation.

With **Validian™ Media Protect**, protecting your creative properties during production, post-production or distribution has never been simpler or easier.

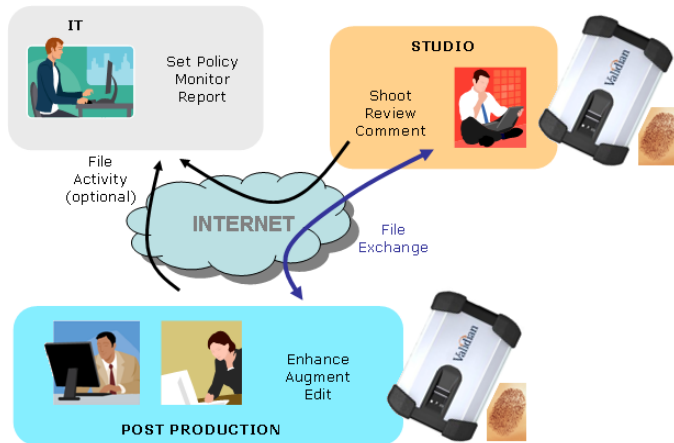

Whether your workflow calls for individual or team activity, for alternating between Windows and Mac computers, for moving your media assets between facilities, or for sharing via courier or the Internet, **Validian™ Media Protect** solution can keep your project safe while at rest and in transit.

The result: a convenient and flexible solution for getting and keeping control over how and when the world gets to see or hear your latest creative endeavour.

Overview

- Integrated HW/SW solution to the problem of securing access, storage, transfer and auditing of the files associated with digital media projects
- High capacity, standard USB drive that allows easy mobility across production facilities (studio, lot location, editing room, post production) and use of any Windows or Mac computer
- Secure access to stored content through advanced fingerprint scanning that guarantees only those users permitted to manipulate your digital assets can do so
- Robust, on-drive encryption in case of loss or theft with no loss of performance due to security features
- Simple, intuitive, and secure file sharing application that protects content during transfers over unsecured networks such as wireless hotspots and the Internet
- Automatic audit trail of file-based events that provides a transparent, near real-time record of custody changes as well as file views and modifications (Forensic Edition)

Protect high-value media assets against unwanted disclosure, theft and piracy

System Requirements

Validian™ SecureDrive

- Windows XP, Windows Vista, MacOS 10.4 or MacOS 10.5
- 512 MB RAM
- Intel Pentium 4 or equivalent
- USB 2.0 slot (available)

Validian™ Share Protect Server 2.0

- Windows XP, Windows Vista, Windows Server 2003 or Windows Server 2008
- 1 GB RAM
- 20 MB disk space (software-only)
- Intel Pentium 4 or equivalent

Validian™ Media Protect Forensic Server 2.0 (optional)

- Windows XP, Windows Vista, Windows Server 2003 or Windows Server 2008
- 1 GB RAM
- 20 MB disk space
- Intel Pentium 4 or equivalent

Features

- Highly-portable, ruggedized and small form factor USB 2.0 drive (Validian™ SecureDrive) with 320 GB of physical storage capacity
- Accommodates files of all types, formats and sizes
- Single-sign-on allows both access to protected files and authentication to built-in file transfer and audit applications
- Support for one or up to four (4) distinct fingerprint signatures per Validian™ SecureDrive for use in individual or team scenarios
- Support for live and scheduled network transfers to other Validian™ SecureDrive (peer-to-peer) or to Validian™ Share Protect Server (client-server)
- Pause triggering and checkpoint restart for stopping/starting network file transfers from desired or communication failure points
- Comprehensive tracking of drive connection, drive access, and file operation events and automatic storage of these to an Internet-accessible Validian™ Media Protect Forensic Server (Forensic Edition)

About Validian

Validian Corporation provides comprehensive solutions for the protection of digital assets such as corporate information, creative properties, and private records. Through innovative technology, Validian ensures the authenticity and integrity of customer data end-to-end, and while in transit or at rest. A U.S. corporation, Validian has offices in the U.S and Canada.
